AMENDMENT UNDER 37 C.F.R. 1.111Box Non-Fee Amendment
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Dear Sir:

This Amendment is being filed in response to the Office Action mailed June 7, 2002 for the above-referenced patent application. Applicant requests that the following be entered into the file of the above-referenced application.

IN THE SPECIFICATION:

The paragraphs below have been amended as follows:

a!

[0021] Referring to FIG. 2, there is shown a back view of the adhesive label (10). As shown, the adhesive layer (18) is provided across the first or back side (20) of only the first section (12) of the label (10), and the first or back side (24) of the second section (14) does not include an adhesive layer (18). In this way, the user of the label (10) places the label (10), or more specifically the first section (12), in contact with the substrate so as to adhere the adhesive layer (18) to the substrate surface. The tab portion (14), which does not include an adhesive layer on first or back side (24), remains free from attachment to the substrate surface. To remove the label (10), the user simply grasps the tab portion (14) and pulls upwardly on the tab, thereby lifting the label (10) off of the substrate.
